9) Southeast Asia Regional Branch of the International Council on Archives
(SARBICA)

Distinguished Guests, Ladies and Gentlemen,

I am very honored to be here today, to host this important event, and it is also my pleasure to welcome you in this Webinar.

On this happy day, let us give thanks for God's grace and blessings, especially health to all of us, so that we can attend the "WEBINAR GENDER EQUALITY, ARCHIVAL DOCUMENTARY HERITAGE, AND MEMORY OF THE WORLD"

Ladies and gentlemen,

United Nations Educational, Scientific, and Cultural Organization (UNESCO) supports gender equality in all aspects. One of the areas, which we believe can further increase the gender-related documents value, is the Memory of the World (MOW) program. UNESCO looks at gender equality documents from three different Gender Equality Markers (GEM): Gender-Sensitive (items that identify and acknowledge gender inequalities but do not address it); Gender-Responsive (items that may include actions/policies that sought to address gender inequality

issues); Gender-Transformative (items that had a real impact or affected changes in a transformative manner).

Among the assessment of the current 155 items of MOW documentary heritage in the Asia Pacific region, only four out of the 155 items have any discernible links to gender or could be deemed to contribute to gender equality.

To find out whether Indonesia has gender documentary heritage that meets the three categories of Gender Equity Markers (GEM), it is necessary to identify and research on archives in the custody of National Archives of Republic of Indonesia. The project would like to identify archives holdings within the institutions that could be categorized under at least one of the three gender equality markers (GEM). The result of this research activity will also be recommendation for the nomination of gender related archival documentary heritage for Memory of the World of UNESCO.

In late 2020, Indonesian Institute of Sciences in collaboration with National Archives of the Republic of Indonesia and UNESCO Office Regional Science Bureau for Asia and the Pacific in Jakarta conducted a research and identification of archives holdings in the custody of National Archives of Republic of Indonesia that categorized under the three gender equality markers (GEM) of UNESCO, in which they could also potentially be nominated for the inscription on the
